ART X401: PHOTO BOOT CAMP

Take command of what you capture in front of your smartphone camera, your point-and-shoot camera, or your DSLR—with creativity and flair.

Offering students an understanding of digital capture from the ground up, this course blends the fundamentals of photography with the application of digital tools to the creative image-capture process. Learn to use manual settings to create compelling imagery with depth of focus, aperture, shutter speed, and sensor settings, while gaining an understanding of the qualities of light and the principles of design.

Taught by Christopher Broughton

Broughton, a renowned photographer as well as educator in the photographic arts, served as a faculty member at Brooks Institute of Photography for more than 20 years. Broughton, whose teaching experience ranged from both undergraduate and graduate courses such as Basic Digital Photography and Photographic Theory has been recognized for his ability to inspire students. He is currently working on a photographic project about artists in Paris.
